We'd heard Sierra Club was paying for it from Binghamton..thought I saw a news article by the mayor accounting for payments for each load...we'd also heard the water buffalo's have been filled from Lake in Montrose, not potable,not sure if that was Cabot at this point, but Drinking water requirements require only potable for domestic purposes. Surprise, surprise Hopey wasn't available this afternoon, so we're still trying to track down TDS but no one has come forth either.

Also, the Range well failed Tubing or packer today when they powered up after being shut down for 6 days over holidays. Dave had been doing weekly MITs since they ran new tubing and packer this summer but it wasn't acting right. No pressure on annulus when operating, but pressure would rise when shut in. It had passed all MITs but we were going to have them shut in to determine where there was fluid migration from anyway. Now they will log all strings and find out if and fluid was leaking into long string.

EXCO signed the penalty order and have submitted a rework plan. We have also inspected their other well to make sure nothing unusual goin on there..just another quiet Friday. Have a good weekend!

Not that - know of. We heard that the Binghamton deliveries were being cut off. Our haz waste OSC's in the field are still gathering information on who has what, but ATSDR identified "Do not Drink" for the organics but Ex. 6 - Personal Privacy don't have data from Test America at this point and we are still trying to identify the additional locations sampled. As of this afternoon I had not heard alternate water needed

Karen,

Ex. 6 - Personal Privacy is reporting that EPA will be providing Dimock residents with water. Is that true?
